MUCH IN HISTORY OF WORDS

Interesting Facts in Development of the Human Race Revealed in Their Origin and Changes.

The history of human beings is often not half so interesting and enlightening as the history of words. Perhaps this is merely to say that human history often is told through the story of words, according to the Christian Science Monitor.

NO MORE INDIAN OUTBREAKS

Red Man Has Given Up Fighting and Western Army Posts Have Lost Their importance.

There is no more interesting proof of the Indian's adaptability to modern ways than that the military stations of the west have lost their former importance. At the present time there is not a single army post maintained east of the Missouri river for fear of an Indian outbreak.

When Europeans settled on the American continent the Indian population within what is now the Unit-1,000,000. In 1885 the commissionwhich showed that there were 350,-000 of the race in this country. while the latest estimates may convey the impression that the race is Five Civilized Tribes.-Red Man.

A DREAM AND ITS RESULT.

In 1720 a terrible epidemic decimated Marseilles and Provence, and Sardinia owed its escape to a dream. At this period the Vicercy of Sardinia dreamed that the disease had invaded Sardinia and that the ravages were frightful. When the Viceroy awoke he was deeply impressed by his dream, and a little later a merchantman put in its appearance at Cagliari and demanded a place to

YOUNG ACADEMICIAN.

Born in 1864, M. Henri de Regnier, the symbolist poet and novelist, one of the new French academicians, is among the youngest members of the academy. The youngest of all is still M. Rostand, who is four years M. de Regnier's junior and had the rare distinction of being elected an academician when he was only thirty-four. The doyen of the academy is Napoleon's old war min-ister, M. Emile Ollivier, who is eighty-five and still actively writing.

TO MAKE PEANUT BUTTER

Way by Which Tendency to Stick to Roof of Mouth May Be

Many persons have formed a dislike for peanut butter because of its ten-dency to stick to the roof of the mouth. This objection may be entirely surmounted by apreading ordinary butter first on the bread and then spreading on a thin layer of peanut butter, pla-cing another buttered (with ordinary butter) slice of bread on top. This makes a most delicious as well as nutritious sandwich.

Peanut butter should be stirred often in order to mix the off and the peanuts. so that when the bottom of the jar is reached all the oil will not have been

It might be mentioned also that per nut butter can now be purchased much cheaper in bulk and by placing it in ordinary jelly jars it will keep as well and as long as that purchased in in dividual sealed jars.

Cut Your Blankets.

Have you ever stopped to think how unsatisfactory a double blanket is? The sunning and airing which all woolen fabrics need frequently most inconvenient when a blanket is uncut. In washing, the weight causes undue stretching in wringing and drying. In varying the covering on a bed, it is much better to be able to add one thickness at a time. Single blankets can be more easily stored in summer. In fact there come no more reason why blankets should be kept in pairs than towels simply because they are woven so! Yet so prevalent is the unsanitary and uneconomical habit, that a word of reminder from an experienced housewife seems in place.-Ladies' World.

Take as much rice as you wish to cook, wash thoroughly until the kale and glucose is removed, add just enough cold water to cover the rice; cover and put over a low gas fire and when it begins to boil add just enough hot water if necessary to keep it slightly moistened. About twenty minutes is summerchia Let sinua live minutes longer and every kernel will be dry and separate. Salt should never be added while cooking it, as it toughens rice. I have taken my lessons in cooking from the Japanese people, and as they eat rice every day and have for centuries back, they ought to know the proper way in which it is cooked.

A Novel Relish.

Guests at an informal luncheon were at first puzzled by a dainty-looking relish brought on with the mest. Not until tasted was the secret revealed, when they discovered that the crisp, brown little tubes, about two inches in length, were of celery.
